## Optimize Everything

We don't believe in compromises when it comes to sound. That's why Velocity amplifiers, speakers and installation parts have been designed specifically for Harley baggers. We are big believers in the great wall of sound. we call it the **"Sound of Freedom"**. We like an aggressive punch-in-the face performance from our systems, and we demand a high-fidelity character that makes our systems sing instead of scream. We beat everybody hands down on loudness and authority - but a loud system should also sound great.

## Beautiful Sounding Horns

With a dual-stage horn flare and a split-ring diaphragm, the RZ75H horns are just beautiful sounding. The RZ75H horns are silky smooth and they handle extreme output levels with ease without breaking up or getting raspy as many horns do.

## Shallow Mounting Depth

We have solved the mounting depth issue with the RZ75H horns by inverting the magnet location so that it is in front of the diaphragm instead of behind it like most horns, this arrangement cuts the length of the driver in half!

VELOCITY AMPLIFIERS

| MODEL        | DESCRIPTION                                  | MC QTY | DEALER   | M/C COST | MAP      | MSRP      |
|--------------|--|--------|----------|----------|----------|-----------|
| RZA1000.4    | 4 Channel Amplifier - 4 x 275 Watts @ 2 Ohms | 6      | \$368.00 | \$350.00 | \$699.99 | \$800.00  |
| RZA500.2     | 2 Channel Amplifier - 2 x 275 Watts @ 2 Ohms | 6      | \$236.00 | \$225.00 | \$449.99 | \$565.00  |
| DT-RZA500 NP | Twin RZA500.2 Amplifiers - No Power Kit      | 1      | \$450.00 | \$450.00 | \$899.98 | \$1130.00 |
| DT-RZA500 WP | Twin RZA500.2 Amplifiers With Power Kit      | 1      | \$500.00 | \$500.00 | \$999.98 | \$1250.00 |

Designed to Fit and to Perform

The RZA series amplifiers are stuffed full of Harley-specific performance features that just can't be found on other amplifiers. All RZA series amplifiers feature a soft turn-on circuit so that you will not get the dreaded ignition pop. Wide range balanced differential signal inputs are used exclusively so that the amplifier works equally well with factory radios or aftermarket radios. Double-sided heat sink for extreme temperatures (no flimsy sheet metal bottoms here). And many more real world Harley

1,100 Watt 4 Channel  
Made For Baggers

Double Trouble Twin 2  
channel Amplifier & Power  
Kit

Two Channels Can Be  
Better Than Four

Whether you are looking for the best fitment, best performance, or best system design options, there are many advantages to multiple two-channel amplifiers over amplifiers with more channels on-board. We designed the RZA500.2 amplifier to work in pairs when installed in the fairing. That's why you can easily fit two of them side-by-side in Street Glide and Electra Glide fairings with plenty of room left over without any modification to the bike.

REAL POWER, REAL NUMBERS, EXCELLENT SOUND QUALITY

The RZA Series amplifiers are the very best-sounding amplifiers made for Harley. Available as a 2 Channel 550 Watt (RZA500.2), 4 Channel 1,100 Watt (RZA1000.4), or as a pair of RZA500.2 (the Double Trouble package) for the ultimate in power delivery and speaker cone control.

# FAIRING SPEAKERS

Velocity has a OverDriver fairing speaker kit for all Street Glide, Road Glide, and Electra Glide fairings.

**A. OverDrive for 2015+ Road Glide**

This kit mounts replaces the factory speaker grill with a steel OverDrive grill loaded with a dual stage horn and backed up by an R65 Neo woofer.

**B. OverDrive Universal for Kit for Custom Installations**

Complete OverDrive component kit with 12db passive crossovers

**C. OverDrive for 2014+ Street Glide & Electra Glide**

This kit mounts replaces the factory speaker grill with a steel OverDrive grill loaded with a dual stage horn and backed up by an R65 Neo woofer.

**D. OverDrive for 1998 – 2013 Street Glide & Electra Glide**

This kit converts a factory 5.25" speaker location to a full blown pro audio 6.5".

**E. OverDrive for Lower Fairings**

Add a world of sound to your lowers. This kit locates the dual stage horn right in front of the mid in a stamped steel grill.

**F. OverDrive for 1998 – 2013 Road Glide**

This kit converts a factory 5.25" speaker location to a full blown pro audio 6.5".

## All Horns Are Not Created Equal

The RZ75H is by far the best-sounding compression horn for Harley applications. We designed this tweeter to have a much smoother and wider frequency response than all other horn designs. This is top-of-the-line. The RZ75H shallow mount horns have a design that is like no other. The unique phase plug (point in the center), horn flare, and diaphragm are optimized to produce a sound quality that is superior to other horns on the market. These horns give you extreme volume levels give you extreme volume levels and hissy like other horns. The RZ75H can be mounted directly in front of a 6.5" mid-woofer and not color the sound.

## Live Concert Sound With an Authoritative Punch

The R65 Neo mid-woofers have a very distinct authoritative response that is much more aggressive than other speakers. Their wide phase coherent frequency range allows them to deliver a much more lively sound than what can usually be found on a bike.

For Every Application

## 3 Year Warranty

Velocity Speakers come with a standard 2-year warranty that is extended to 3 years when installed by an authorized Velocity Speaker Design installation facility.

SPK-13-SG-OVERDRIVE

## VELOCITY OVERDRIVE COMPONENT SETS

| MODEL    | DESCRIPTION   | MC QTY | M/C COST | MAP      | MSRP     |
|----------|---|--------|----------|----------|----------|
| RZ65-OD  | OverDrive 6.5 inch Component Speaker Set (no grills)  | 1      | \$360.00 | \$799.99 | \$900.00 |
| RZ690-OD | OverDrive 6.x9 inch Component Speaker Set (no grills) | 1      | \$315.00 | \$599.99 | \$790.00 |

### Velocity OverDrive Component Sets

▲ OverDrive component kits come with RZ75H horn tweeters, 12 dB passive crossovers, and a pair of R65 Neo 6.5 inch mid-bass drivers or R690 6x9 woofers. This is the kit to get if you want the best speakers but you do not need the model or location-specific grills and tweeter mounting kit

### Velocity Speakers a la carte

▼ Velocity speakers are available in pairs outside of kit form. Coax horns (RZ65H & RZ69H) are fantastic on their own in fairings and lowers of 2014 and later bikes without the need for special grills or hardware.

| RZ69H   | 6x9 inch Pro Audio Horn Coax Speaker Set              | 4      | \$307.00        | \$292.50        | \$649.99        | \$730.00        |

### THE BEST COMPONENTS FOR EVERY BUILD

Velocity Speaker Design was formed as a direct result of the need for better speakers that are designed to perform at a much higher level for baggers. Not cars, not boats. For years we have been consulting for other speaker manufacturers on technical design, but we have always felt that we could do better ourselves. That is why we now produce the highest quality speaker lineup in the bagger industry.

**VELOCITY COAX HORN SPEAKERS**

| MODEL | DESCRIPTION                              | MC QTY | DEALER   | M/C COST | MAP      | MSRP     |
|-------|--|--------|----------|----------|----------|----------|
| RZ65H | 6.5 inch Pro Audio Horn Coax Speaker Set | 4      | \$274.00 | \$261.00 | \$579.99 | \$655.00 |
| RZ69H | 6x9 inch Pro Audio Horn Coax Speaker Set | 4      | \$307.00 | \$292.50 | \$649.99 | \$730.00 |

**PRO LEVEL COAX HORN SPEAKER**

The Velocity RZ65H speakers are a huge jump forward in tunability for pro-audiotype speakers on Harley baggers. We built the RZ65H speakers to sound better out of the box without the typical response issues of horn-loaded pro-audio-type speakers.
