### **Wireless Apple CarPlay & Wireless Android Auto**

Keep your iPhone or Android phone safely stashed away in clothing pocket or saddlebag. Pair enabled phones to V2 for a truly cordless & tangle-free ride with wireless Apple CarPlay and Android Auto.

### **GPS Navigation Powered by NNG iGo**

A journey may take you through cellular dead zones, making phone navigation apps useless. iGo by NNG, an embedded offline map system, includes maps and POI of USA & Canada; wherever a journey takes you.

### **iDataLink Maestro Compatible**

iDataLink Maestro RR & RR2 connect V2 with the OEM ECM to display engine sensor & diagnostic data available on the motorcycle's CAN network. Additionally, OEM audio systems can be retained & custom handlebar controls can be programmed for a unique rider experience.

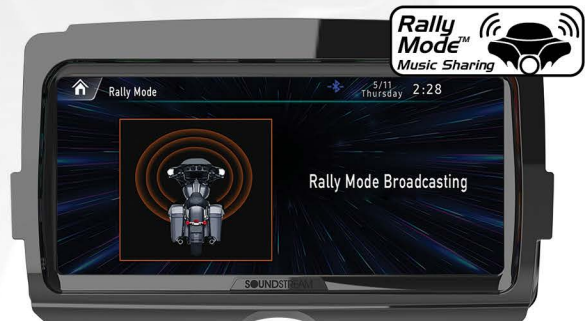

### **SiriusXM® Satellite Radio Ready**

SiriusXM is where moments happen. The widest, deepest variety of music, ad-free. More games, more sports, more coverage than anywhere. The most extensive entertainment, complete news coverage and every kind of comedy. Listen on your bike, on your phone, online, and at home.

### **Wireless Headset Integration**

Pair OEM or aftermarket Bluetooth enabled headsets or earbuds to V2's wireless headset interface. Each rider can choose to hear only GPS navigation system commands, only music, or both.

### **Rally Mode Music Broadcasting**

Become the DJ of your ride group with Rally Mode music broadcasting. Rally Mode enabled head units & accessories paired together turn any ride or pit-stop into a traveling rock concert.
