SPEAKER ADAPTERS

5 Year Warranty

IP-6x9-SPACER

1/2 Inch 6x9 Spacers

These spacers are the exact footprint of a standard 6x9 basket, allowing them to be used in lids where regular car audio-type 6x9 spacers will not fit. These spacers are lifesavers!

IP-6x9-BULLET

6X9-Bullet

The all new IP-6x9-Bullet allows you to mount bullet style compression horn tweeters in a coax type arrangement over a 6x9 mid-bass driver. This kit is designed to bolt into a standard aftermarket 6x9 speaker lid or a lid cut-in kit. Sold in pairs

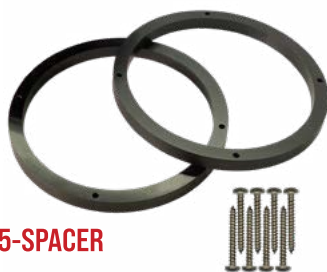

All New!

IP-14PFK

Horn Adapters for Gauges 2014+

locate 2" compression horn tweeters in your small gauge locations on Street Glides, Road Glides, and Electra Glides.

IP-6.5-SPACER

1/2 Inch Spacers for Lowers

These spacers are sized specifically for Harley lowers. Allows the speaker grill to sit flush.

IP-14-5x7-6x9
& IP-14-5x7-6x9-L

2014+ 5x7 to 6x9 Adapter Kit

Convert factory 5x7 lids to big bad 6x9 speakers. CNC machined in the USA. Bestseller

CNC MACHINED IN THE USA

All of our CNC-machined parts are made right here in Rocklin California.

CNC-machined parts are much more rigid and have better integrity in extreme temperatures than cheap injection molded parts. By machining our parts from solid blocks of HDPE we are able to ensure that the part will not fail under the demands of high-performance speakers and ruthless weather. That is how we are able to give all of our parts an unheard-of 5-year warranty.

LOCKED!

American Hard Bag 6x9 adapters for factory 5x7 lids are the only adapters on the planet that work with factory electric lid locks. We make electric lock versions of all our 2014 and later 5x7 to 6x9 kits. Electric lock-compatible SKUs are the same numbers but end in "L". So be sure to check if the bike you are working on has electric lid locks. We have you covered either way!

PLUG & PLAY HARNESSES

5 Year Warranty

WH-SBB2

Most Popular

Universal Rear Speaker Harness for Lids or Bag Woofers

Sealed plug & play at each bag. Unterminated at amplifier and speakers.

WH-SBB2-PNP

Plug & Play Rear Speaker Wire Harness for Lids

Serviceable connections at the amplifier, both bags, both lids, and both speakers. This harness is the premium option

WH-14-PNP-F

Most Popular

2014+ RCA Adapter for Factory Radio

Connect the radio's speaker out to DSPs and amplifiers with RCA inputs. Order part# WH-14-PNP-R for rear,

WHK-24AH

Saddlebag Amplifier Wiring Kits

Saddlebag Amplifier Harness per-configured for 2 channels of signal. Typically used if adding bag speakers and an amp to an existing system. Also available for 4 channels of signal. Order part# WHK-44AH

WH-14-SH-NOCB

2014+ Power & Ground Plug & Play

2 amp power is perfect for DSP modules. Compatible with all bikes not equipped with factory CB radio.

WH-14-ACC

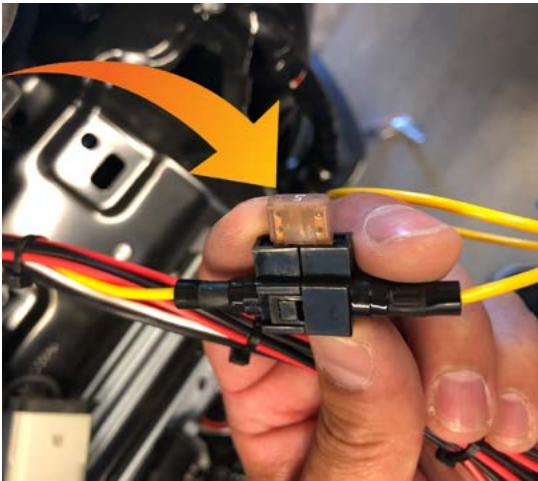

Plug & Play Accessory Power in Fairing

Compatible with all bikes not equipped with powered antenna in fairing. Perfect for amp turn-on and DSP.

www.AmericanHardBag.com

OPTIONED OUT MODULAR PLUG & PLAY

WH-CI2-12 Heavy Gauge Subwoofer Wire Harness for Saddlebags

This harness is perfect example of how simple 2-conductor connection from the amp to the speakers turns into a 6-part harness with 8 high amperage connection points when you wire Harley saddlebags the proper way. It is not a complicated harness but fabricating one from scratch would eat precious time that is better spent on other parts of the job

SADDLEBAG WOOFERS

5 Year Warranty

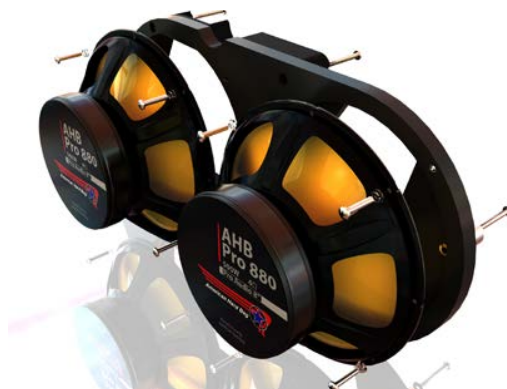

IP-AP80-LR

8 Inch Bag Woofer Kit

Aggressor Pro 80 comes as a left and right side kit and places one woofer in each bag. Precision CNC machined mounting kit with all stainless hardware, router templates and steel grills.

IP-AP880-L

Twin 8 Inch Woofer Kit (Left Bag)

Aggressor Pro 880 comes as a left side kit and places two woofers in the bag. Precision CNC machined mounting kit with all stainless hardware, router templates and steel grills.

IP-AP880-R

Twin 8 Inch Woofer Kit (Right Bag)

Aggressor Pro 880 comes as a right side kit and places two woofers in the bag. Precision CNC machined mounting kit with all stainless hardware, router templates and steel grills.

IP-AP880-L+R

Twin 8 Inch Woofer Kit (L+R Bags)

Add up to four 8" full-range woofers to your Harley Bagger with the Aggressor Pro 880 kits. This kit makes mounting two 8" speakers in each saddlebag quick, easy, and clean.

CNC MACHINED ANCHOR POINTS

IP-Brace-L/R

Performance Upgrade

▶ CNC Machined anchor points bolt to the woofer basket and bond to the opposing wall of the bag. This turns an ordinary saddlebag into a high-performance subwoofer enclosure by eliminating bag vibration and flex. Universal fit for all popular bags, woofers and woofer mounting systems.

The Right Part for the Job

American Hard Bag

AMPLIFIER MOUNTING RACKS

5 Year Warranty

SADDLEBAG OR Tour Pack

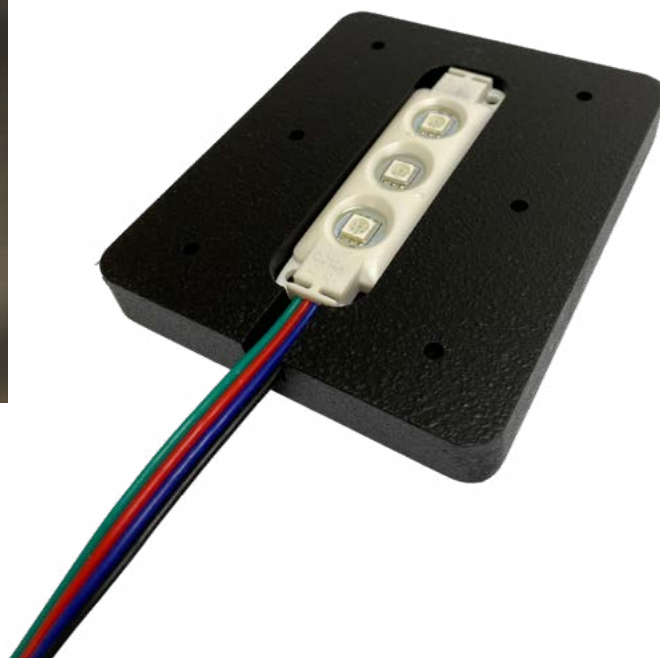

Easy Install and Great Looking

Now adding an amplifier to the bags is simple. Our Bond-in rack system does not require any mounting holes to be drilled into the bag. This system uses a small ½" thick mounting puck that gets epoxied into the bag. The acrylic mounting rack then bolts to the mounting puck. This makes the entire assembly serviceable and gives you space under the amp to hide wires and connections.

RGB Lighting

Optional LED lighting allows you to show off your installation. This module can be wired for many different solid colors or it can be used with any standard RGB LED controller.
