STADIUM SUBWOOFERS

CAR AUDIO SUBWOOFERS

FEATURES

JBL believes sound quality should never be compromised. Stadium subwoofers make sure you don't have to compromise flexibility, either. That's because these high-performance subwoofers feature SSI™ (Selectable Smart Impedance), a patented impedance switching technology that lets you select the optimum impedance – 2 or 4 ohms – for your system. We have also engineered aero-cooling in the voice coil to boost power handling as well as reliability.

- SSI™ (Selectable Smart Impedance)
- Oversized 75mm AERO Cooled Voice Coils
- High-Roll Surrounds
- Progressive Spider
- ABS Woofer Cone
- High-Current Compression Terminals

SUBFUSEAM

THE HOLY GRAIL OF IN-VEHICLE BASS SOLUTIONS

FEATURES

JBL Fuse is a dual-compact passive subwoofer solution that offers multiple installation options to a broad variety of vehicles. The flexible design allows Fuse to be installed as a traditional trunk sub box, to even more non-conventional installs such as stealth & split, below a false floor. The Injection-molded enclosure finished in heavy matte black textured finish along with shallow driver and passive radiator combo minimizes size and maximizes durability in even the most esoteric install requirements – all while delivering that signature JBL bumping bass.
